

VINESH B

Chennai, India | +91 9123547780 | vineshbhaskar31@gmail.com

OBJECTIVE

Software Developer with 1+ year of experience building real-time mobile and web applications, seeking to leverage expertise in React, TypeScript, Flutter, and cloud technologies to build scalable, high-impact products. Experienced in healthcare technology (BLE medical device integration, real-time ECG/SpO2 visualization), launched a production social networking platform (mysaga.in), and built IoT systems with Raspberry Pi, NFC, and AWS. Strong foundation in cross-platform development, RESTful APIs, and Agile delivery.

SKILLS

Languages: Java, Python, JavaScript, TypeScript, Dart
Frontend: React.js, HTML5, CSS3, Tailwind CSS, Responsive Design
Mobile: Flutter, Kotlin, Cross-Platform App Development
Backend / APIs: Node.js, RESTful APIs
Cloud: AWS EC2, AWS S3, Google Cloud, Cloud Architecture
Tools: Git, GitHub, Figma, WebRTC
IoT / Hardware: BLE, NFC, NRF Boards, Raspberry Pi, Embedded Systems
Concepts: Data Structures & Algorithms, Agile, UI/UX Design, Real-Time Streaming

EXPERIENCE

Software Developer Intern | Rhythm RX (Medical Technology Startup)

May 2025 – Present

- Built Flutter healthcare apps for real-time ECG, SpO2, and respiration monitoring via BLE-connected NRF devices, processing 3+ vital sign streams simultaneously
- Implemented end-to-end BLE pipeline (scanning, pairing, live streaming), reducing device connection time by 30%
- Improved waveform visualization accuracy by ~20% through UI optimization, directly enhancing clinical diagnostic reliability

Frontend Developer & Designer | Yuktie Engine

Sep 2025 – Present

- Designed and developed the complete frontend for mysaga.in, a live production social networking platform
- Developed reusable React components and responsive interfaces using TypeScript and Tailwind CSS for scalable frontend development
- Collaborated with backend and product teams to deliver end-to-end features from design to deployment

PROJECTS

My Saga — Social Networking Platform | React, TypeScript, Tailwind CSS | mysaga.in

- Designed, built, and launched a social networking platform that unites people with shared goals into collaborative groups — live in production with real users
- Architected the full frontend with responsive design, component-based patterns, and cross-browser compatibility across 5+ major browsers

NRF-Based Health Monitoring App | kotlin, BLE, Sensors

- Real-time mobile app visualizing SpO2, ECG, and respiration waveforms from NRF boards via BLE with CSV export for 50+ patient records

Raspberry Pi Cloud Camera System | Flutter, Raspberry Pi, Google Cloud, WebRTC

- Built a mobile app for live Raspberry Pi camera streaming with auto-upload to Google Cloud and WebRTC-based remote camera access across local network devices

AWS Real-Time Streaming App | Flutter, AWS EC2, AWS S3

- Flutter app receiving live PPG/ECG data from Nordic UART embedded device, stored on AWS and rendered in real-time on mobile

NFC-Based IoT Automation System | Python, NFC, Web, Electronics

- Hardware integration system using NFC readers with automated web portal updates, NFC tag read/write, and Excel data export

EDUCATION

B.Tech Information Technology

Easwari Engineering College, Chennai | Expected Graduation: 2027

CGPA: 8.14/10

Higher Secondary (Class XII)

GRT MV, Chennai

91%

Secondary School (Class X) – CBSE

Jawahar Vidyalaya School, Chennai

82%

CERTIFICATIONS

Oracle Java SE 17 Developer | Cisco Networking Basics | Microsoft Generative AI & Copilots | Microsoft Fabric & Data Analytics | Infosys Springboard – Operating Systems
